## **International Conference on Engineering Vibration**

Sofia, 4-7 September 2017

## Foreword

### Dear Colleagues,

It is our great pleasure and privilege to welcome you to the International Conference on Engineering Vibration (ICoEV-2017) held in Sofia, Bulgaria between 4 and 7 September 2017.

The International Conference of Engineering Vibration (ICoEV) originates from a long-running series called the International Conference of Vibrational Problems (ICoVP), which was founded in India over 20 years. The last conference organised in Ljubljana in 2015, was renamed as International Conference of Engineering Vibration (ICoEV). The ICoEV-2015 has attracted some 250 participants from around the world including senior scientists, PhD students and practising vibration engineering.

The Steering and Organising Committees of the conference have made great efforts to maintain the high scientific standard of the papers. The conference is based on two full days and two half days of technical presentations, structured into four parallel sessions. On each day of the conference there will be an invited lecture in the morning but on Monday and Tuesday the afternoon sessions will start again with invited lectures. The presentations are organized into 16 mini-symposia and one other with general topic.

The social programme includes a welcome reception at hotel Hilton on Monday, which is free for everybody, a Wednesday afternoon guided city tour of Sofia including a visit of the National History Museum and the conference dinner on Wednesday for the registered participants with full registration fee. The program for the registered accompanying persons includes additionally one-day tour to Rila Monastery, including entrance in the museum and lunch in the area on 5th September 2017 (Tuesday).

The ICoEV-17 conference venue, Hotel Hilton is located at the heart of the Bulgarian capital Sofia. It is surrounded by the city's South Park, opposite the National Palace of Culture and overlooking the Vitosha Mountain, and it is situated in the centre of Sofia City and is in walking distance from most of the historical and cultural places.

We express our gratitude to the Secretary of the Organizing Committee, Assoc. Prof. Stanislav Stoykov who has done an excellent job in making this conference a reality. Further thanks also go to the members of both the Scientific and Steering Committees, to our six invited speakers, to the organisers of the mini-symposia, to the National Research Fund who supported the event and to all the contributing authors.

On behalf of the Steering and Organizing Committees we sincerely hope that you will all enjoy your time in Sofia during our conference.
